Jan 2024 - Present (1y 10m)

Aussie heart, London spirit – laid-back style.
Retail · eCommerce

CSSHTMLJavaScriptGoogle AnalyticsSalesforceVue.jsGitTailwind CSS

- Implement and maintain frontend and backend JavaScript code for the Hush website.
- Ensure application performance, reliability, and scalability through well-written code and testing.
- Collaborate with product and design teams to understand feature requirements and user needs.
- Develop new features from scratch, including both UI components and business logic.
- Optimize and enhance existing features for better performance, usability, and efficiency.
- Troubleshoot, debug, and resolve application issues to maintain seamless functionality.
- Prioritize and manage bug fixes based on severity and impact.
- Participate in code reviews to ensure code quality, consistency, and adherence to best practices.
- Document code, processes, and feature development for easy handoff and knowledge sharing. Maintain and update technical documentation as the codebase evolves.
- Stay updated with the latest JavaScript frameworks, libraries, and industry trends.
